Tar Yield

7 mg/cig

Nicotine Yield

0.6 mg/cig

Carbon Monoxide Yield

7 mg/cig

Ingredient	Function
Tobacco	-
Water	-
Glycerol	Humectant/Solvent
Invert sugar	Flavour
Propylene glycol	Humectant/Solvent
Sucrose and/or sucrose syrup	Flavour
Cocoa and cocoa products	Flavour
Flavourings	Flavouring
Nitrogen	Processing aid

Footnotes to Table 3 - Cigarettes

Tar yield	As declared on the pack.
Nicotine yield	As declared on the pack.
CO yield	As declared on the pack.
Ingredient	International Union for Pure and Applied Chemistry (IUPAC) name or common chemical name of the ingredient, listed in descending order by weight.
Binder	Maintains the physical state and texture of the product.
Colour	Modifies the colour of a component of a product.
Combustion modifier	Influences how the product burns.
Filler	Contributes to the bulk of the product without contributing significantly to odour, taste, flavour or aroma.
Flavouring	Natural, nature identical and artificial flavours and flavour compounds that are individually used at less than 0.1% of the weight of the tobacco blend (including moisture).
Humectant	Prevents the product from drying out.
Preservative	Protects the product from deterioration caused by micro-organisms.
Processing aid	These are added by the tobacco manufacturer to facilitate the manufacturing process and they are either not present in the end product or occur in residual amounts and have no function in the final product.
Solvent	Used to dissolve, dilute an ingredient without altering its function in order to facilitate handling and application. Some solvents may contain denaturants.

Footnotes to Table 3 - Cigars, Pipe Tobacco and Snuff Tobacco

Ingredient	International Union for Pure and Applied Chemistry (IUPAC) name or common chemical name of the ingredient, listed in descending order by weight.
Binder	Maintains the physical state and texture of the product.
Colour	Modifies the colour of a component of a product.
Combustion modifier	Influences how the product burns.
Filler	Contributes to the bulk of the product without contributing significantly to odour, taste, flavour or aroma.
Flavouring	Natural, nature identical and artificial flavours and flavour compounds that are individually used at less than 1.0% for Cigars and Pipe Tobacco and 5.0% for Snuff Tobacco of the weight of the tobacco blend (including moisture).
Humectant	Prevents the product from drying out.
Preservative	Protects the product from deterioration caused by micro-organisms.
Processing aid	These are added by the tobacco manufacturer to facilitate the manufacturing process and they are either not present in the end product or occur in residual amounts and have no function in the final product.
Solvent	Used to dissolve, dilute an ingredient without altering its function in order to facilitate handling and application. Some solvents may contain denaturants.
