Footnotes to Table 3 - Cigarettes

Tar yield	As declared on the pack.
Nicotine yield	As declared on the pack.
CO yield	As declared on the pack.
CAS-No(s)	Chemical Abstract Service Registry Number (where available).
Ingredient	International Union for Pure and Applied Chemistry (IUPAC) name or common chemical name of the ingredient, listed in descending order by weight.
QNE	Quantity Not Exceeded - The percentage by weight of the ingredient in the tobacco blend (including moisture), which is not exceeded for the respective ingredient for this manufacturer in these products in this Member State. There are no QNEs for processing aids.
Binder	Maintains the physical state and texture of the product.
Colour	Modifies the colour of a component of a product.
Combustion modifier	Influences how the product burns.
Filler	Contributes to the bulk of the product without contributing significantly to odour, taste, flavour or aroma.
Flavouring	Natural, nature identical and artificial flavours and flavour compounds that are individually used at less than 0.3% of the weight of the tobacco blend (including moisture).
Humectant	Prevents the product from drying out.
Preservative	Protects the product from deterioration caused by micro-organisms.
Processing aid	These are added by the tobacco manufacturer to facilitate the manufacturing process and they are either not present in the end product or occur in residual amounts and have no function in the final product.
Solvent	Used to dissolve, dilute an ingredient without altering its function in order to facilitate handling and application. Some solvents may contain denaturants.

Footnotes to Table 3 - Cigars and Fine-Cut Tobacco

CAS-No(s)	Chemical Abstract Service Registry Number (where available).
Ingredient	International Union for Pure and Applied Chemistry (IUPAC) name or common chemical name of the ingredient, listed in descending order by weight.
QNE	Quantity Not Exceeded - The percentage by weight of the ingredient in the tobacco blend (including moisture), which is not exceeded for the respective ingredient for this manufacturer in these products in this Member State. There are no QNEs for processing aids.
Binder	Maintains the physical state and texture of the product.
Colour	Modifies the colour of a component of a product.
Combustion modifier	Influences how the product burns.
Filler	Contributes to the bulk of the product without contributing significantly to odour, taste, flavour or aroma.
Flavouring	Natural, nature identical and artificial flavours and flavour compounds that are individually used at less than 1.0% of the weight of the tobacco (including moisture).
Humectant	Prevents the product from drying out.
Preservative	Protects the product from deterioration caused by micro-organisms.
Processing aid	These are added by the tobacco manufacturer to facilitate the manufacturing process and they are either not present in the end product or occur in residual amounts and have no function in the final product.
Solvent	Used to dissolve, dilute an ingredient without altering its function in order to facilitate handling and application. Some solvents may contain denaturants.
